# Soundscapes for new patterns of work

Tomorrow's workplaces will be more sustainable, more human, and more creative. They will be designed with a greater focus on well-being and health. It is these kinds of environments that we at Abstracta strive to help create.

Our starting point is always a space's soundscape. We are convinced that awareness about the importance of soundscapes in terms of well-being will continue to grow.

Our products are designed to address the diversity of requirements that characterise contemporary workplaces. The opportunity for employees to work undisturbed, and the fundamental necessity of a pleasant soundscape and a stimulating visual surrounding.

# Sales/delivery conditions Free

## Prices

Prices listed are in EURO gross, VAT excluded and valid from March 1, 2024. All previous price lists are hereby cancelled. We reserve the right to change prices, design and payment terms without prior notice. For current and updated price list - contact Sales Support. In the event of a difference between a printed and digital price list, the latest digital version always applies.

## Offers

Offer is unless otherwise specified valid in 30 days. Orders are accepted only by written purchase order.

## Terms of payment

Payment 30 days net or as otherwise agreed. Late payment interest of 10% is charged per month on overdue invoice. The goods will remain Abstractas property until fully paid. We reserve the right to a credit check.

## Payment

Only by International Bank transfers, payment by cheque is not accepted. Bank details according to the invoice.

## Terms of delivery

According to Incoterms 2020

- DAP, (Delivered At Place), normal packaging included.
- Dispatch of standard products is between 2-6 working weeks from order confirmation date.
- Dispatch of customized products is between 3-12 working weeks from the order confirmation date.

## Transport

Free delivery of orders with a value over €750 Net. A freight and administration fee of €60 Net will apply on orders below this value. Plenty Wall is excluded from this rule and are billed according to current shipping price. If tail lift will be needed for deliveries this must be noted on PO and can cause an extra charge. If changes of delivery address is needed when order left Abstracta ware house this will be charged on separate Invoice. It is not possible to change delivery day when goods have been dispatched without extra charge. Telephone notification is not an on-time and on-site demand, only information about estimated delivery time. If deliveries will be denied a second delivery will be charged on separate Invoice.

## Transport on-time and on-site demand

On-site and on-time unloading requests will be charged at prime cost.

## Damages and claims

### *Transport damage:*

Upon receipt of the goods, the recipient must check that the consignment is correct with respect to the number of packages and condition of the goods. If a package is damaged or missing, this must be immediately noted on the consignment note to the driver as well as immediately in writing be notified to Abstracta. Hidden damages that have not been apparent upon receipt, or damages that could not reasonably have been noted due to e.g. large volumes of goods, shall promptly be notified in writing to Abstracta within six calendar days. Any damage should be photo documented to facilitate the assessment of claims for compensation. Damaged goods must not be moved to another location.

### *Other customer complaints:*

Complaints are handled before detailed report including photos have been submitted to our Claims Support. Abstracta may require return of the product to conduct a proper investigation. Abstracta shall after approved claims either repair or replace defective products.

## Order confirmation

The order confirmation is the basis for the order and is expected to be reviewed by the buyer within 48 hours. After 48 hours, the order is considered recognition of customer approval unless otherwise notified. We reserve the right to charge a fee for changes or in the event of cancellation made after approved order confirmation.

## Returns

Returns cannot be done without first contacting our Sales Support for acquiring a return form. Return of stock items are allowed within 14 days after delivery date. The goods must be sent in original packaging. The customer stands for return shipping. Any shipping damages occurred will be charged to the customer. Abstracta charge the customer 30% of the value of the goods in return deductions. Minimum return costs are €40.

## Weight

Specified weights are net weight (excl. packaging).

**Cancellation of orders**

Cancellation of stock items may take place no later than 3 working days after the order confirmation date. In case of cancellation of the manufacturing goods, the cost of the work will be charged.

**Warranty**

5 year warranty, counted from the date of delivery, provided the goods immediately upon delivery have been placed indoor with normal temperature and has not been subjected to unusual wear or damage. The warranty applies to material-, production- or construction failures. Normal wear and deterioration of damage to lacquered details are not covered by our factory warranty. Abstracta even leave 10 years spare parts warranty from date of delivery. Delivery dates shall be evidenced by the customer.

# Abstracta Fast Supply

2-5 days  
dispatch!

The following products can be delivered from the factory within 5 working days once the order is marked **Fast Supply**.

- If an order contains both Fast Supply products and standard delivery time products, the despatch time is controlled by the standard delivery time products.
- Orders from the Fast Supply inventory can not be freight consolidated with other orders.

- Prices are according to the price list. Stock Discounts does not apply!
- Orders are invoiced on the same day as it is ready, regardless collection date.
- Orders from the Fast Supply can not be handled by prepayment.
- With reservation for clearance sale.

## MagVision writing board

**Measurement:** 980x630 mm,  
1180/1480/1980x1000 mm.  
**Colour:** Optic white.

## Sketchalot writing board

Including legs.  
**Measurement:**  
790x2000x210 mm.

## Softline floor screen

Softline 30 incl. legs.  
**Measurement:** 800x1500,  
1000x1500, 1200x1500 mm.  
**Fabric:** Salsa -036. Black legs.

## Softline table screen, modesty panel

Softline 30 incl. fittings.  
**Measurement:** 830/1200/1400/  
1600/1800x650 mm.  
**Fabric:** Salsa -036. Black legs.

## Scala Wall absorber

**Measurement:** 1207x1600/2300  
mm.  
Vertical version.  
**Fabric:** Soundfelt -016, -017.

## Scala Ceiling absorber

**Measurement:** 1600x1207 mm.  
With or without lighting in black  
stained ash.  
**Fabric:** Soundfelt -016, -017.

## Lily acoustic lighting

**Measurement:**  
900/1200x61 mm.  
Including lighting.  
**Fabric:**  
Focus Melange 60309, 60311.  
White core.

**Airflake, blade open**

10-pack  
**Measurement:** 400x345mm.  
**Fabric:** Soundfelt VF (eco/fire),  
-015, -016, -017 alt. Hemp.

**Aircone**

10-pack  
**Measurement:**  
465x405x85 mm.  
**Fabric:** Soundfelt VF (eco/fire),  
-015, -016, -017 alt. Hampa.

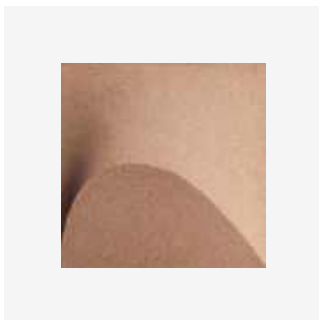

**Airleaf**

10-pack  
**Measurement:** 290x465 mm.  
**Fabric:** Soundfelt VF (eco/fire),  
-015, -016, -017 alt. Hemp.

**Air-X**

10-pack  
**Fabric:** Soundfelt VF (eco/fire),  
-015, -016, -017 alt. Hemp.

**Sahara**

4-pack  
**Measurement:**  
450x450x60 mm.

**Wall rail Sahara 4-pack**

**Airbloom**

10-pack  
**Measurement:** 475x510 mm.  
**Fabric:** Soundfelt VF (eco/fire),  
-015, -016, -017 alt. Hemp.

**Zen Pod Essential  
Small Clean**

Left-hinged door  
**Measurement:** 1200x1200x2310

**Zen Pod Essential  
Medium Clean**

Left-hinged door  
**Measurement:** 1200x2310x2310

# Textiles – Suppliers & branding

Below is a list of textile suppliers and the quality-/sustainability brands valid for the textiles we use. Valid price for each product group is indicated on the product pages in this pricelist. For information about prices of other textiles/supplier than indicated below - please contact us: sales@abstracta.se

Most of the textiles in the list below are eco-labelled with Möbelfakta or Ecolabel and some are extra wide matching wide floor screens with dimensions over 1200 mm. (See colour symbol for guidance).

## Guide

- = Swedish Möbelfakta
- = For wide floor screens >1200 mm
- = Ecolabel
- = Light resistance
- = OEKO Tex
- = Nordic Swan Ecolabel

# Care instructions

## Fabric

To maintain the color and appearance of the fabric, it should be vacuum cleaned regularly with a soft nozzle.

### **Stain Removal for cotton, canvas and polyester:**

- Use colorless towel or a washcloth to absorb as much as possible of still-moist stain. Dried stains should be vacuumed.
- Wet the stain sparingly with a white pure cotton cloth, warm water and possibly a little pH-neutral cleaner.
- Dab the area with a dry cloth or colorless paper towel to absorb the moisture and stain.
- Repeat this process until the stain is gone.
- On the final repetition, use only clean water with no detergent added.
- Finish by dabbing up moisture with a dry cloth or paper towel.

### **Stain Removal for wool:**

Dab or wipe gently with a damp cloth.

## Cork

Our cork surfaces are kept clean and in good condition by vacuuming them regularly with a soft brush nozzle.

### **Stain Removal:**

Carefully wipe up any stains using a damp cloth. Then dry the surface.

### **Disinfection of Sahara acoustic panel:**

The Sahara acoustic panel is made completely from cork and is now approved to be cleaned using disinfectants, enabling it to be used in rooms where fabric covered acoustic panels are not suitable.

## Whiteboards nad glass boards

Remove any protective film from the writing board and thoroughly clean the surface before first use. Moderately-used writing boards should then be cleaned a couple of times a week. The board must be absolutely dry when used. Use only pens intended for whiteboards. Replace the felt on the eraser on a regular basis.

### **Clean as follows:**

- Wipe with approved cleaning fluid intended for whiteboards.
- Then wash away residual cleaning solution with clean lukewarm water.
- Wipe dry with a cloth.

- Repeat if necessary.
- Easier soiled paintings can be cleaned with only lukewarm water.
- Wipe dry with a cloth.

### **Note:**

Avoid detergents that are not intended for whiteboards (e.g. soap or detergent) when they can leave residues which hinder erasure.

## Table top surface (dB Forbo linoleum surface)

### **Regular maintenance:**

- Wipe daily with a damp cloth and pH-neutral detergent or a mixture of water / soap or water / wax.

### **Stain removal:**

- To protect the table surface, always use underlays under cups, flower pots, etc.
- Remove stains as quickly as possible! To do so, use a pH-neutral detergent and water.
- Pigmented stains can be removed with turpentine or other oil-based solvents.

*Note: Do not use alkaline or alcohol-based cleaners!*

# Acoustics

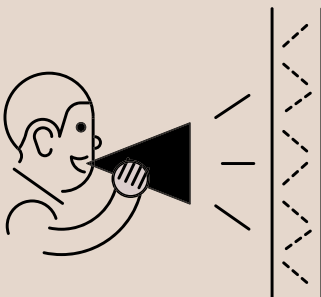

In recent years, the awareness of how everyday sounds affect us has grown steadily. This has been accompanied by an increasing interest in how design can be used to reduce noise and create better soundscapes. The process of achieving a pleasant soundscape is to reduce the echo effect in a room, also known as the reverberation time.

The three primary methods of reducing the actual noise level and reverberation time in a room are acoustic absorption, diffusion and attenuation. Many of our products feature combinations of these methods.

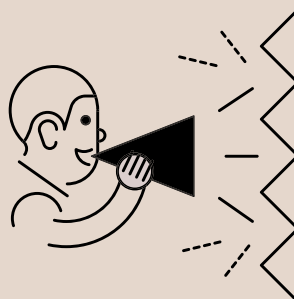

## Absorption

Absorption means that the sound that hits a surface gets absorbed and transformed into heat.

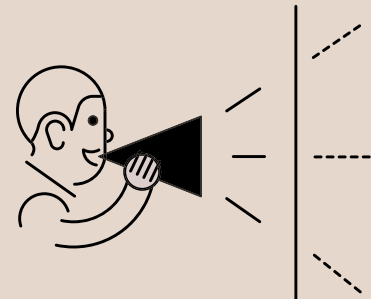

## Diffusion

Diffusion means that a sound hitting a surface "shatters", which helps one avoid unpleasant sound reflections, in other words echoes.

## Attenuation

Attenuation means that an object shields off and lessens the sound level from one side of the object to the other.

# Sustainability

Read more about  
our sustainability  
work: [abstracta.se/  
sustainability](https://abstracta.se/sustainability)

Since 1972, Abstracta has been working to create better soundscapes, making us pioneers in acoustic products. Well-being is at the heart of our business, including the well-being of future generations and the planet. Sustainability is a natural part of our operations. We are accompanied on this journey by skilled suppliers and designers who take sustainability and soundscapes as seriously as we do at Abstracta.

## Abstracta 2030 – our five sustainability goals

- Carbon neutral
- 100% recycling of textile waste
- 100% certified wood material
- 100% Swedish Möbelfakta certified products
- Circular product range

## What we do to reduce our carbon footprint

- Offset emissions in 2022 in Scope 1, 2, and parts of Scope 3. Mapping of remaining parts of Scope 3 is ongoing.
- Textile waste and PET bottles are used as material for acoustic filling.

- Our factory in Lammhult is powered 100% by electricity from renewable sources. Installation of a solar panel system for the Lammhult factory is underway.
- We only purchase company vehicles that are electric cars or plug-in hybrids.
- We prioritize local suppliers, reducing transportation. In 2023, over 80% of the purchasing volume was from Swedish suppliers within 250 km reach from our factory in Lammhult.
- Third-party-reviewed EPD documents available for about 40% of our products by the end of 2023.
- In 2023, we received our first Nordic Swan Ecolabel certified products.
- We became FSC® certified in 2023.

## Abstracta's Reuse Service

We offer a reuse service for our customers. It involves collecting used sound absorbers and other products for renovation, reuse, or recycling. To facilitate circularity, our products consist of exchangeable parts, simplifying repair, reuse, and recycling. Contact our sales support team for more information!

## Certificates and Labels

As part of our sustainability efforts, we are certified according to several standards and sustainability labels:

### ISO 9001, 14001 og 45001

Quality, environmental, and occupational health management systems.

## MÖBELFAKTA

### Swedish Möbelfakta

Swedish Möbelfakta is a reference and labeling system for furniture, including requirements for product quality, environmental impact, and social responsibility. Certified products meet sustainability requirements set by an independent third party. Additionally, requirements are continuously tightened and developed from a life cycle perspective. All our certified products can be viewed on Möbelfakta.se. We strive to certify all our products according to Möbelfakta.

### Nordic Swan Ecolabel

The Nordic Swan Ecolabel is an eco-label with strict environmental requirements. The criteria promote renewable or recycled materials, ensuring that certified products generally have a lower environmental impact. It is also required that the product is not treated with hazardous chemicals and that indoor air quality is not negatively affected. The requirements also cover the product's quality and its circular properties, contributing to an extended product lifespan. Our certificates are available on Svanen.se.

### EPD Norway

Some of our products have an EPD (Environmental Product Declaration) published on EPD-Norge.no. An EPD is based on a life cycle analysis and covers the entire product life cycle. The environmental impact of the products can be seen in the EPDs, including carbon emissions, among many other factors. An EPD must follow international standards for each product category, enabling the comparison of our products with others.

### FSC

FSC® (Forest Stewardship Council®) works to promote sustainable forestry. Abstracta has been FSC certified since 2023, meaning we can choose to certify products that meet the requirements. An FSC certified product means it comes from responsibly managed forests, and the forestry is environmentally appropriate, socially beneficial, and economically sustainable. Products included in our certification are marked in the price list. Contact us for more information or if you wish for another product to be FSC certified..

### Acoustic Facts

The acoustic values of our sound-absorbing products are presented on AcousticFacts.com, where products can be compared objectively. This ensures that all technical data is accurate and meets international, European, and Swedish standards.

# Abstracta Agile

Design Studio Stockholm. The new mobile media screen, makes it easy for a team to quickly and spontaneously get together for a meeting! In many workplaces, there is a growing need for a product that combines technology/monitors with writingboard. Abstracta Agile acts as a project room on wheels that features all the tools you need: screen, foldable laptop desk, concealed cable for connecting to the screen and mains power. The screen itself is sound absorbing, and features a writing board on the rear.

[▶ Technical specification](#)

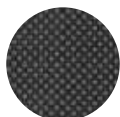

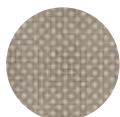

### Abstracta Agile mobile media screen

Metal frame, painted in one of 3 available colours. The legs feature lockable wheels. The top section of one side can accommodate a TV screen of up to 55". To buy the product and a TV screen together, add "NEC video conferencing solution" to your order as an accessory. If you want to use your own TV instead, it should be no more than 1240 mm (55") wide. The lower part of the screen is upholstered and has a sound absorbing filling, as well as space to conceal electronics. The other side of the screen features a full length magnetic whiteboard. There is a foldable laptop desk on one side of the frame, which features an integrated cable (USB-C) for screen sharing and laptop charging. Power can be connected from ceiling, floor, right, left hand sides. Fabrics: 175 000 20: "Repetto" 1201, 175 000 30: "Repetto" 1801 and 175 000 40: "Vidar 4" 1511.

# Abstracta x Wall of Art

The new Abstracta x Wall of Art concept combines acoustics with contemporary art. Working in conjunction with digital art platform Wall of Art, we are able to offer a collection of works from emerging artistic talents, printed on canvas and fitted in elegant oak or dark stained wooden frames. The picture is backed by an acoustic screen that effectively absorbs sound from the room. Choose from a range of works from artists such as Lena Wigors, Annika Hultgren, Evelina Kroon, Lucrecia Rey Caro, and Lisa Wirenfelt. The product is available in three sizes and perfect for both home and office, as well as in cafés, restaurants, and hotel environments.

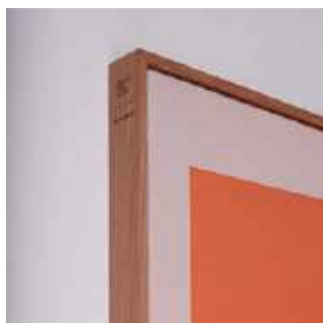

[▶ Technical specification](#)

### Abstracta x Wall of Art - acoustic wall art with oak frame

Image printed on cotton canvas using a high quality sublimation technique and fitted in an elegant oak frame. The picture is backed by an effective sound absorber made from recycled textile. Choose between three different sizes and 13 different images produced by up-and-coming contemporary artists, specify suffix no. The dimensions of the pictures itself without frame are: 500x700x30 / 700x1000x30 / 1000x1400x30 mm. NB The dimensions given below are the total dimensions of the acoustic art panels including the frame. The panels are mounted on hidden wall fittings (included).

### Air series suspension rails

Each suspension rail includes accessories that enable suspension from both ceiling and on walls. The following components are included with Air suspension rails: Aluminium rail, wire with adjustable wire lock, end closure, coupling fittings between rails, wall bracket, coupling fittings to Air product, suspended ceiling mounting for 25 mm T-profile, and a ceiling mounting. Before purchasing a Radius Bent rail, ask Sales Support which pattern configurations are technically compatible with that type of rail.

# Akunok

Design Maja Ganszyniec. The name Akunok plays on the words acoustic and nook. The new acoustic furniture concept by Abstracta and designer Maja Ganszyniec is highly ambitious in that it tackles two of the biggest challenges facing many of today's workplaces. The first is to create better soundscapes that promote well-being and job satisfaction. The second is to offer employees separate, pleasant smaller areas where they can focus on their work in comfort, either alone or in small groups. The concept includes comfortable acoustic seats, an innovative floor screen, and two neat tables.

[▶ Technical specification](#)

### Akunok floor screen

Consisting of solid pine frames, soft sound-absorbing filling, and fabric with an elegant French seam, the Akunok twin floor screen is a simple yet effective acoustic solution. The overlapping juxtaposition of the twin screens significantly enhances acoustic performance by trapping noise between the two surfaces. The floor screen's base is available in several colours.

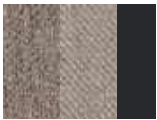

Description, WxHxD mm	Kg	Art nr	Price A	Price B	Price C	Price D	Price E
Akunok twin floor screen 1570x1610x312	36	197 600 10	1 531	1 858	2 242	2 354	2 795

### Akunok acoustic seating

Available as a one-seater and a two-seater, the high-backed, generously sized Akunok acoustic seat features pocket springs for maximum comfort, making it a cosy booth for contemplation and rest within dynamic environments. The seat's high quality is reflected in its materials and an evident attention to details, such as the beautiful French seam on the seatback and the tubular steel base frame that protrudes just enough to give the piece its unique character. Akunok is available in a selection of fabrics and colours. Its frame also comes in several colours.

\* The darkest fabric is applied as follows: Acoustic sofa/chair: back+side panels, Twin floor screen: the taller screen.

### Akunok table

The Akunok series includes two handy and versatile tables, one round and one oval. Both table tops are made of oak. A clever base with two tubular steel legs allows users to pull the table forward so that the table top slightly overlaps the seat cushion. The base is available in several colours.

Design Nina Jobs. Alumi is a sober and flexible series of sound-absorbing screens. Alumi is available in several colours and discreet patterns. The screens are framed in an elegant aluminium rail. The inside consists of a material that reduces the sound level and brings an increased level of comfort to the acoustic environment. Fabric is applied to both sides. Choose between a smooth surface or three different felt patterns. Felt patterns are also available with Focus Melange fabrics. The screens are installed without tools.

[▶ Technical specification](#)

### Alumi floor screen

Screen with an aluminium frame in white or anodised version. The screen is filled with a sound absorbing material. Upholstered with fabric on both sides. Legs to be purchased separately.

# Basic Baffle

Use baffles to effectively dampen sound in rooms with high ceilings! The sound absorbing raw core is made out of polyester derived from recycled PET. Basic Baffles are available homogeneously in raw material, known as "Soundfelt". Soundfelt can also be covered with fabric where the Soundfelt core can be seen at the edges. A wire kit for ceiling mounting is included.

[▶ Technical specification](#)

### Basic baffle

# Bits Wall Panel

Design Anya Sebton. The triangular shape of Bits Wall not only provides a playful and appealing expression, but also effectively breaks sound waves and therefore affords better room acoustics. The patented wall fitting allows the panels to be hung either horizontally or vertically, enabling you to create imaginative patterns on any wall!

[▶ Technical specification](#)

### Bits wall panel

Sound dampening wall panels in two different sizes made from form-pressed polyester fibre, upholstered with fabric. Purchased per module. Wall fittings included.

Design Thomas Bernstrand. The ambition with dB is to give more space to the individual and to create opportunities for people to express themselves in their surroundings. The screens can be upholstered in any fabric. Instead of legs, screens have a cast base, which allows them to be angled as desired when combined with each other. The cast base also conceals cable routing. The series includes a writing board, a cork notice board and additional accessories that allow space for photos, magazines, plants and other personal items. Enclosure combinations are available with and without integrated desktop. The integrated desktop is height adjustable. Desktop in laminate or Abstracta's own Strata top with linoleum surface. The disc is sound-absorbing. For enclosures with an integrated desktop, four hidden electrical outlets are included. For enclosures with a front screen wider than 1200 mm, fabric that is compatible with wide floor screens must be used; see p. 10.

🔗 Technical specification

**dB floor screen**

Floor screen that can be used freestanding or connected to other dB screens (connectors purchased separately). The way in which the cast base is designed means that the screens can be angled in any position when combined with each other. The cast base also conceals cable routing. Black cast base. Wheels available separately as accessories.

# dB Modular Sofa

Design Thomas Bernstrand. The vision with dB is to create a screen system that acts as subtle scenography for open office environments, made to be brought to life by the people that work there. The range has now been supplemented with functional modular sofas that can be built in ringed or straight shapes that expand the acoustic area of the space. The modules can be easily added to existing dB pillars, but also well on their own as separate pieces of seating furniture. Create a sense of seclusion using modular sofas to form a sort of box. Add to your dB unit as your room needs change! The product is filled with sound absorbing fabric offcuts sourced from Abstracta's own factory in Lammhult.

[▶ Technical specification](#)

### dB rectangular pouffe

Freestanding, rectangular pouffes that can be assembled to form a variety of seating configurations. The single module is used as an end module and is available both with and without power sockets. Augment your seating area with extender modules, which come with a connector that allows you to connect modules on the short sides and the long sides of your arrangement. The only thing limiting how you connect and reconnect units is your imagination!

Description, WxHxD mm	Kg	Art nr	Price A	Price B	Price C	Price D	Price E

### dB 120 degree pouffe

Freestanding, rounded modular pouffes with a 120 degree bend that are perfect for building a seating area around dB Pillar or creating freestanding seating furniture. The single module is to be used as an end module. Augment your seating area with extender modules, which come with a connector that allows you to connect modules on the short sides and the long sides. The only thing limiting how you connect and reconnect units is your imagination!

Design Thomas Bernstrand. In architecture, the pillar plays a load-bearing role. With his new product for Abstracta, award-winning designer Thomas Bernstrand explores the potential of the pillar to add value and function to a space. The dB Pillar is filled with sound-absorbing waste fabric from Abstracta's factory in Lamnhult. As a result, the product contributes to Abstracta's long-term goal of achieving a circular production process. dB Pillar is characterised by the same level of simplicity and playfulness as the other products in the dB series. dB Pillar is available as a desk, pallet and pillar with various functions and appearances, e.g. newspaper rack with planter on top.

[▶ Technical specification](#)

### dB pillar

This innovative pillar is 1930 mm tall and is available in three models with magazine rack, clothes hooks, or a whiteboard. All models have a flowerpot on top. The 700mm tall pillar is available with a flowerpot or waste paper basket. The 1100mm tall pillar has a flowerpot on top. Fabric must be selected for all pillars (2/3 of pillars with whiteboard are made up of fabric). For information about pens and whiteboard accessories, see the final page of the price list (PDF version - [click here](#)).

### Domo accessory rail

Domo desk screen can be supplemented with a accessory rail in white painted metal. Cannot be retro-fitted, must be purchased together with the screen. Select "Toolbar accessories" if you want to hang it on the rail! These are made from white ABS plastic and can be hung at two levels. There is a pen holder, large shelf, and a small shelf. Both shelves have holes for routing cables. It is not recommended that this rail is used with computer monitors.

# Domo Wall Panel

Design Stefan Borselius. Domo's elegance is fully evident when several panels are combined together on a wall. A beautiful interplay between light and shade is created when the bevelled edges meet each other.

[🔗 Technical specification](#)

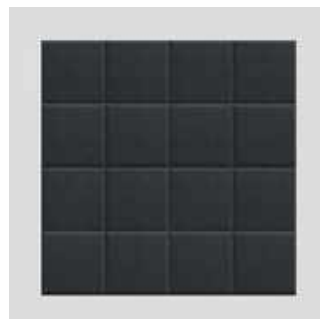

### Domo wall panel

Domo Wall is a wall-mounted sound absorber with bevelled edges. Available in rectangular and square-shaped performances and can be fitted horizontally or vertically, which means you can build symmetrical or asymmetrical pattern formations. The wall absorbent is hung using concealed suspension fittings.

Description, WxHxD mm	Kg	Art nr	Price A	Price B	Price C	Price D	Price E

Design Runa Klock & Hallgeir Homstvedt. Holly acoustic lighting is sculptural, mysterious, and plays with the contrasts between light, reflection, and shadow. The product is good at absorbing low frequency sound. Available in two versions; horizontal and vertical, with or without lighting. The light globe is made from opal glass - an opaque, white glass that produces a beautiful, even light. The soft, globe-shaped absorbers are made from recycled fabric that has been transformed into SoundfeltRec material and is upholstered in a 3D-stitched melange seamless covering (polyester). The fabric is available in 3 different colours.

[▶ Technical specification](#)

### Holly vertical

The vertical acoustic lamp consists of: 4 light globes combined with 6 spherical absorbers. The acoustic lamp has a metal stand that is painted black. Lamps included: E27, 500 Lumen, Kelvin 2700. Luminaire is dimmable. DALI light control is available. Ceiling mounting bracket included. Wire length 6 m. Electric cable length 6 m.

### Textiles

Holly Fabric

Design Runa Klock & Hallgeir Homstvedt. Lily brings a whole new perspective on the acoustic products that are often in the nature of something that is added to an interior to solve noise problems. With Lily, the designers have instead created a lamp where the sound dampening function is integrated without disturbing neither the shape of the object nor the experience of the room. Lily can be ordered with or without DALI control.

[▶ Technical specification](#)

### Lily 1200

Sound absorbing lamp (diameter 1200 mm), with or without lighting. The LED light fitting is dimmable. For a list of recommended dimmers, see the installation instructions on the website. 230V, CRI 90, 950 Lumens, 2700 Kelvin, diffusion angle 110 degrees. The core is available in white polyester or Hampa, which is made from hemp and starch. Ceiling anchor included. Wires 6 m long. Electrical cable is 6 m long.

# Moon

Design Thomas Bernstrand. Moon is a carefully curated meeting of light and sound, signed by sculptor Thomas Bernstrand, who combines his extensive experience of lighting with his interest in soundscapes. The new, sound absorbing Moon lamp brings a classic, clean shape to the acoustic lighting segment. The luminaire is recessed in the lamp, creating a comfortable, downward, and glare-free light. The outer layer of the globe is made from polyester felt and comes in a range of different colours. The felt covers a sound absorbing core, which is made from recycled PET. Moon absorbs both low frequency and high frequency sound waves.

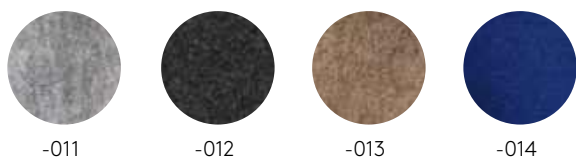

[▶ Technical specification](#)

## Moon

Sound absorbing, globe-shaped ceiling lamp. Luminaire is dimmable. DALI light control is available as standard. Ceiling mounting bracket included. Power cord length 4 m. The metal parts of the luminaire are available painted white or black. The fabric covered power cord harmonises with the colour of the felt covering. Felt covering colour options: -14 Dark blue (black luminaire), -12 Dark grey (black luminaire), -11 Light grey (white luminaire), -13 Beige (black luminaire). Moon is also available in a version without lighting, acting as a ceiling-mounted sound absorber.

Textfel

Design Poul Christiansen. Innovative MyHive stylishly integrates desktop and screen into a complete workstation. MyHive is available in either 90 or 120 degree modules in 3 versions; height adjustable table top, fixed table top (three fixed positions), or as a sofa. Concealed cable routing for a cleaner appearance, cables are kept hidden by using a smart zipper function. The body of the screen consists of a wooden frame with sound absorbing filling. Screen thickness: 50 mm. Worktop height above floor 730 mm, (Adjustable worktop: Min. 685 mm Max. 1185 mm). New in 2024! Quieter motor for height adjustment, stitched upholstery for a smoother appearance, matte black-coated base, black cable management under the table.

[▶ Technical specification](#)

### My Hive workstation 120

120-degree tabletop or sofa integrated with the sound absorbent screens. Cables and the tabletop's height adjustment mechanism are concealed in the screen. Depth: 870 mm.

# Sahara

Design Gabriel Tan. In Sahara, it is the material itself that speaks, or rather whispers. Waste material from cork production is a malleable natural material that is ideally suited for creating sound diffusing shapes on wall panels. The panels are as simple as they are spontaneous, and a perfect starting point for forming patterns of various kinds. The possibilities range from geometrically strict patterns to vibrant and alternating formations such as sand dunes. It was the similarity between the texture of cork and sand that gave the designer the spark of inspiration he was looking for.

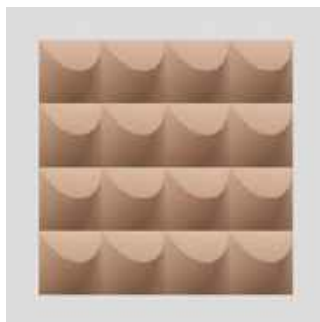

[▶ Technical specification](#)

### Sahara wall panel

Cork wall panel fitted on concealed wall fittings. Wall fittings included. Note that cork is an organic material, and therefore, there may be some differences in color and dimensions between individual absorbent modules. Tolerance level: +/-2 mm.

Description, WxHxD mm	Kg	Art nr	Price A
Sahara 4-pack 450x450x60 Nat. kork	4	187 700 00	590

Design Anya Sebton. Scala is a perfect yet simple interplay between material and form, making the product ideal for use on large surfaces. Its form is inspired by corrugated sheet metal, being based on sinus curves that create natural air gaps behind the product that, in turn, deliver a product with better absorption characteristics. The sinus curve gives the product a larger absorbing surface that if it had been completely flat. The modules are moulded panels that contain a sound-absorbing, fire-class core that can be upholstered with fabric. The product is partly made from recycled PET. Soundfelt VF material is compliant with fire resistance requirement B-s1,d0 in accordance with EN13501. Floor screens, table screens, and suspended panels have fabric on both sides.

[▶ Technical specification](#)

### Scala floor screen

The screens are upholstered on both sides of a die-cast, sound absorbing core, made from recycled waste fabric. A steel tube stand holds the screen in place and emphasises the spontaneous design. The stand is available in black lacquer. Height quoted includes foot.

Scala Baffle vertical 1207x400x60	4,2	190 593 00	503	554	738	794

### Scala ceiling

The ceiling hung version of Scala prevents sound waves from continuing upwards in the room, contributing to a more pleasant acoustic landscape in, for example, office or restaurant environments. Includes wire kit for adjustable hanging. LED lighting 3000 Kelvin, 1840 lumen. A dimmer kit is available as an optional extra. Can be ordered with or without DALI control. Soundflet VF material is compliant with fire resistance requirement B-S1,d0 in accordance with EN13501. Wire/electric cable length: 3 m.

# Scala XL

Design Anya Sebton. "The inspiration for the design comes from Icelandic houses, where not only the roofs but also the façades are covered by corrugated sheet metal. That got me thinking of how to introduce that feature, that feeling, into an interior space," says Sebton. Scala, Abstracta's hugely popular absorber range, has evolved, including its XL version, into an upscale variant of the original model, giving an interesting impression. Scala XL is perfect for vertical mounting on a wall. Available in convex and concave forms, 2300 mm or 1600 mm tall. The core of the sound absorber is made partially from recycled polyester recovered from PET bottles. Soundfelt VF material is compliant with fire resistance requirement B-S1,d0 in accordance with EN13501. The surface of the sound absorber is customisable, available in a wide variety of fabrics and colours.

 Technical specification

### Scala XL, convex

Scala XL is perfect for vertical mounting on a wall. These convex modules are installed discreetly on a wall using invisible metal fittings in the rear of the panel (included). Available in heights of 2300 mm and 1600 mm.

Description, WxHxD mm	Kg	Art nr	Price A	Price C	Price D	Price E

### Scala XL, concave

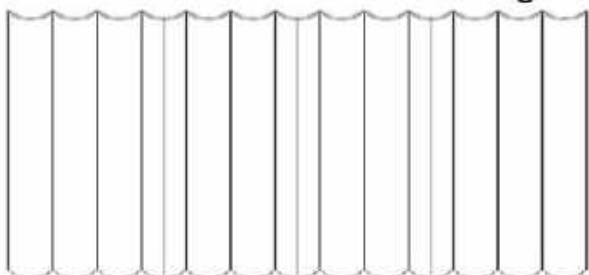

Scala XL is perfect for vertical mounting on a wall. These concave modules are installed discreetly on a wall using invisible metal fittings in the rear of the panel (included). NB When several modules are placed next to each other, it is important that each end of the pattern is completed by a "Right" (on the right hand end) and a "Left" (on the left hand end) module in order to produce a beautiful completion of the waveform. Between these, only fit "Centre" modules. The "Single" version is to be used when installing individual modules, i.e. where there is no adjacent panel. Available in heights of 2300 mm and 1600 mm.

Description, WxHxD mm	Kg	Art nr	Price A	Price C	Price D	Price E

Single

Design Stefan Borselius. Thanks to its sculptural form, Sky delivers a radical improvement to the acoustic landscape. The shape's starting point is the sphere, which Stefan Borselius has reduced to an hourglass-like shape that forms beautiful wave patterns when the modules are combined with each other. Sky is available for both walls and ceilings.

[▶ Technical specification](#)

### Sky ceiling panel

Sky Ceiling is easily fitted on the existing inner ceiling using magnets. Sky Ceiling consists of an in-house developed acoustic core that, when combined with Camira Xtreme CS fabric, is compliant with fire requirement B-s1, d0 in accordance with EN13501. Purchased by the module, magnets for fitting to existing inner ceiling are included. NB If your suspended ceiling does not have a magnetic supporting structure - purchase bracket item no. 190 901 00.

Softline is a classic screen system that effectively absorbs sound and creates a more pleasant acoustic environment. The screen is built on a solid wooden frame with sound-absorbing filling. Softline's extensive range leaves no screening or acoustic problem unsolved. However, if this does not suffice, the product can be adapted as necessary. No tools are required to set up the screens. The screens can be equipped with shelves and other accessories. Legs increase screen height by 50 mm. The screens can be made in other sizes upon request!

[▶ Technical specification](#)

### Softline 30 floor screen assembly incl. legs

Complete screen set! Black legs included raise the height of the enclosure by 50 mm. Choose between Dox & Salsa fabric (Price group A) and Focus Melange fabric in 6 standard colours (Price group C). In order to create an enclosure around a desk, there are complete enclosure configurations in Soneo and dB series.

Soneo is a complete family of high performance absorbers that take the form of wall, desk and floor screens. Available in a wide range of sizes and variants to meet today's acoustic requirements. Legs increase height by 50 mm.

[▶ Technical specification](#)

### Soneo 30 floor screen assembly incl. legs

Complete screen set! Black legs included raise the height of the enclosure by 50 mm. Choose between Dox & Salsa fabric (Price group A) and Focus Melange fabric in 6 standard colours (Price group C). In order to create an enclosure around a desk, there are complete enclosure configurations in Soneo and dB series.

# Soneo Wall Panel

Soneo Wall, with its discreet smooth shape, can cover a large wall area and, thus, melt into the background. Exciting formations are created thanks to the colour of the absorbers and placement in relation to each other. Each module consists of a sound-absorbing filling in a fabric covered wooden frame. Soneo Wall 100 has extra depth for better absorption. Soneo Wall is mounted on concealed fittings.

[▶ Technical specification](#)

### Soneo wall panel

Wall modules that can be combined to form various patterns. Soneo Wall 100 is extra deep for improved absorption. Mounted on concealed fittings. Soneo Wall is made in accordance with technical, environmental and production ethical requirements. Wall fittings included.

Design Stefan Borselius. Stitch is soft both in terms of the materials as well as its expression, making it an exceptional absorbent. The screen consists of a sound-absorbent filling, fitted inside a solid wooden frame. Around the frame is a separate fabric upholstery. The legs are made from ash and have a soft, friendly idiom, just like the screen. Works just as well at home as in the office.

[▶ Technical specification](#)

# Triline Wall Panel

Design Anya Sebton. Triline Wall sound absorbing modules have a straight finish, meaning that the product is perfectly suited to creating full coverage patterns on large walls. Can be mounted horizontally or vertically, giving you the freedom to create both symmetrical and asymmetrical pattern configurations. Mounted easily using hidden suspension rails. The absorbers consist of a sound absorbent filling mounted in an MDF frame, upholstered with fabric.

[▶ Technical specification](#)

### Triline wall panel

Sound absorbing wall absorbers. Purchased per module and mounted on concealed wall fittings (included).

# Trumpet

Design Stone Designs. Trumpet acts as a reversed trumpet - instead of producing sound, it absorbs sound. "It isn't a sound absorber with LED lighting. It's a lamp with acoustic characteristics," says Cutu Mazuelos, who designed Trumpet for Abstracta together with fellow designer Eva Prego. This distinction is decisive for the two designers, whose aim is to not only reduce the sound level in spaces but also to contribute a visual element that enriches peoples' everyday lives. Trumpet has a solid wood body and an acoustic core made from recycled waste fabric and worn-out PET bottles. Upholstered in a wide range of fabrics. The height of the panel can be easily adjusted. Trumpet is available with and without DALI light control.

🔗 Technical specification

### Trumpet lighting/baffle

Suspended absorber with or without LED lighting (dimnable). Available in uplight and downlight versions, as well as a version that features both! A 3-metre wire with a ceiling anchor and 6 metres of electrical cable are included. 230V input. Size W1000 = 1760 Lumen output, size W2000 = 3520 Lumen output. 3000 Kelvin, 30W. DALI lighting control is available and can be purchased separately.

# Vika

Design Khodi Feiz. In collaboration with designer Khodi Feiz, Abstracta takes a new approach to acoustic lighting — one that aims to create a peaceful atmosphere. The result is Vika, a sculptural floor screen that manages both low-frequency and high-frequency sounds while radiating pleasant ambient light. Vika is also available as a ceiling-mounted acoustic luminaire that provides excellent general lighting over desks, for example.

[▶ Technical specification](#)

### Vika floor screen with luminaire

The floor screen is available in two sizes: a smaller, elongated one evocative of a light pillar and a larger one that functions as a room divider. Vika consists of a soft, sound-absorbing core, partly made of recycled PET bottles, and is covered with Texfel acoustic felt. Its luminaire consists of 12V plastic LED tubes, 150 cm in length, with an output of 14.4 W/m and a colour temperature of 2700 K. The power cord is 3 m. Vika is available in a range of select screen colours, each affecting the light's character. The darker the textile, the more subdued the light. It features a black-coated metal leg stand and is optionally available without lighting.

Description, WxHxD mm	Kg	Art nr	Price A
Vika floor screen without lighting 427x1540x231	8	192 211 00	1 047

### Vika ceiling-mounted acoustic lighting

Consisting of a soft, sound-absorbing core, partly made of recycled PET bottles, the acoustic luminaire is covered with Texfel fabric. Its lighting consists of 12V plastic LED tubes, 150 cm in length, with an output of 14.4 W/m and a colour temperature of 2700 K. The power cord is 3 m. Dali-compatible. The luminaire is easy to adjust in height by means of two included 3-metre wires and a wire lock and is available in a range of select screen colours. The lighter colours provide brighter light, while darker ones provide more subdued light.

# Plenty Pod

When you need an undisturbed room for an individual meeting, work or an important phone call, PlentyPod is the solution. Plenty Pod is a series of silent rooms that have become an obvious component in today's activity-based workplace solutions. Plenty Pod is available in three different sizes, which we call Small, Medium and Large. The table top is supplied as standard in Plenty Pod Small, and additional power sockets and network connections are available as options in all models, which means that you can connect a laptop for video or web conferencing. Ventilation, LED lighting and electrical sockets come as standard. Shipping included. Supplement your Plenty Pod with an NEC video conferencing solution (see accessories). Sound Class B.

[🔗 Technical specification](#)

### Plenty Pod fixed module, Small

Module WITHOUT acoustic floor. Choose between natural/white anodised or painted in any RAL Classic colour on the frame. If you choose a RAL-painted frame, buy a fabric coated outer panel. Inner walls are upholstered in Focus Melange. Other coatings available by separate quote. 2x230V electrical outlets included. Plenty Pod Small includes a desk as standard, which is positioned at a height of 1010 mm (from floor to top edge of the desk top). NB Installation not included in the price, quoted separately.

Description, WxHxD mm	Kg	Art nr	Price A
Plenty Pod Small natural anodised 1200x2200x1200	231,1	122 000 60	11 227

# Zen Pod

Design Staffan Holm. The new Japan-inspired series Zen Pod makes it easy to create oases of tranquillity in the workplace. Zen Pod consists of small, mobile, quiet rooms that are impeccably designed. Available in different sizes. All feature an inner floor, stand foot, and wheels. Painted aluminium frame. Two of the walls are made from sound absorbing acoustic glass. The two other walls are sound absorbing and upholstered with fabric on both sides. The sound absorbing ceiling features comfortable shallow angle lighting along the entire inner edge. Ventilation, shallow angle lighting, and power sockets (230V) and controls are included. Shipping included. Sound insulation: Class A in accordance with ISO 23351. Absorbing wall compliant with ISO 20189. Choose between different equipment packs and different furnishing packs. See matrix. New 2024: Zen Pod is now available in two additional, slightly larger room units; XL and XXL.

-  Technical specification
-  Matrix

### Zen Pod, Small

A mobile, quiet room for 1 person. Perfect for taking phone calls or for working for a while in a focused manner. Desk with one glass wall, supplied as standard in Small. Choose your equipment and furnishing pack, see description in matrix.

Design Stefan Borselius. The soft design language of Moow adds an exciting new expression of a functional rail system. Moow consists of wall-mounted whiteboards in e3 enamel suspended on either wheels and a wall rail, or fixed directly to a wall. The whiteboard can also be used alone standing on its wheels against a wall when not suspended on the wall rail. Flip chart block holders are available as optional accessories.

Sketchalot is a modular whiteboard that doesn't require any fixing on to the wall. The design allows whiteboards to be placed close together and directly against the wall, which means they do not take up much space. Sketchalot has an E3 enamel writing surface and rests on two detachable, easy to fit feet in white painted aluminium. The reverse is white.
