AK 1 is a functional workplace divider for commercial interiors. Made from sustainable PET Felt and acoustic filling, the divider offers sound-dampening properties. AK 1 creates individual workstations at shared desks in offices and co-working spaces. The divider is available in eleven PET Felt blends and compatible with the majority of standard-sized tables.

Designed by **De Vorm**

## Product overview

## Sustainability goals at De Vorm

We strive to do more with less when creating a comfortable living and working environment. To fulfil this purpose, we are constantly looking for sustainable materials, local suppliers and partners sharing the same values. Ensuring that our products are recycled, durable and recyclable after a long lifespan.

### PET Felt technology

PET Felt is made from recycled PET bottles. Cut into smaller flakes, plastic is turned into thin fibres that are intertwined together to form a layer of felt. Further, it is pressed into the shape of a final product with the heat. As a result, PET Felt material is soft to touch and sturdy enough to be used for chair shells and room dividers. PET Felt is UV-stabilised and offers sound-dampening properties due to its open-cellular structure.
